October 2, 2012

Dear Customer:

Oak-Mitsui Technologies is revising the Part Numbers for our FaradFlex® line of products. The prefix for the Part Number for all of our FaradFlex® products will begin with "MC" rather than "BC."

This is only a change in nomenclature, and no change is being made to the FaradFlex products themselves. Product composition and specification will remain unchanged, and the product data and qualifications for UL and other industry test organizations will remain unchanged.

This change in FaradFlex part numbers will be effective November 1, 2012.

The changes are:

PREVIOUS PART NUMBER	NEW PART NUMBER
BC24M ----- >	MC24M
BC12M ----- >	MC12M
BC8M ----- >	MC8M
MC25L	<i>No Change</i>
BC12TM ----- >	MC12TM
BC8TM ----- >	MC8TM
BC16T ----- >	MC16T
MC25ST	<i>No Change</i>
MC25LD	<i>No Change</i>

Please let me know if there is any additional information you require regarding this change to ensure it fits into you current engineering design or material procurement systems.

Best regards,

Bob Carter
Director of Business Development and Technology, Oak-Mitsui Technologies

Thank you for your interest in FARADFLEX®!
